Solid Beech

Our specialty is kiln-dried European beech drawers, prefinished with our multi-step UV finish. European beech is one of the finest cabinetmaker's hardwoods. The Valen kiln-dried material yields a light colored drawer with an attractive, subtle grain. In combination with our natural finish, the look is superb. Valen Solid beech originates in the well-managed forests of Romania. Our associated supplier Valenext makes the initial processing of the solid beech, starting from the original log. Valenext monitors quality to be sure the final product will meet Valendrawers' high standards.

Material

13mm (1/2") Beech
16mm (5/8") Beech
